

Oil Products

The oil products service analyses the global oil product market and includes separate reports for light ends, middle distillates and fuel oil.

Subscribers benefit from monthly reports and regional outlooks, e-mail alerts, data reviews, access to our analysts and regular events hosted at our global offices.

Covering topics from naphtha to fuel oil, Energy Aspects' oil products service delivers data analyses, fundamentals, market updates and region- and product-specific outlooks. Market participants rely on this service to drive trading and investment decisions and to deliver profits.

monthly

Light Ends Outlook

This monthly report analyses the essentials driving global gasoline and naphtha balances and prices, delivering insight into price determination from a global perspective on these increasingly integrated markets. We cover each region by analysing changes in main indicators (such as individual country demand, supply, inventories and trade flows) for products, and we also provide price forecasts and historical indicative margins. The report covers all the information relevant to these complex markets.

Published
monthly

Light Ends Outlook - Regional Overview

This report accompanies the Outlook and drills down into the key indicators of demand, supply, trade, inventory and prices for light ends products by region—Asia-Pacific, Middle East and Africa, Europe, FSU, North America and Latin America—to give the reader deeper insight into each market.

Published
monthly

Middle Distillates Outlook

This monthly report covers market drivers for middle distillates in North America, Europe, Asia-Pacific, Latin America, the FSU, the Middle East and Africa that will influence future supply and demand. The publication provides complete analysis and insight into the middle distillates market.

Published
monthly

Middle Distillates Outlook - Regional Overview

Alongside the Outlook, this publication goes into granular detail on the key indicators of demand, supply, trade, inventory and prices for middle distillate products by region—Asia-Pacific, Middle East and Africa, Europe, the FSU, North America and Latin America. This gives readers region-specific data that will help with both specialised and general decision making.
