Global LNG

The global gas market is going through a rapid evolution. Disparate and regionally separate gas markets are being brought together through the expansion of global trade. In this fast-emerging global gas market, Energy Aspects offers a fully integrated service.

We cover all main gas markets, analysing the developments in each market’s core fundamentals and price drivers. We have a range of publications which span data analysis, market fundamentals and trends. The service provides globally consistent forecasts of supply and demand balances and prices, with a focus on the front two years of the curve.

Global LNG forms part of the Natural Gas service which also includes European Gas and North American Gas. Together they provide comprehensive analysis of the global market. Alternatively, each region is available as a stand-alone service.

Our global team of experienced analysts delivers the insight, analysis and data relied on by market participants to drive investment decisions and maximise profits.

Outlook
The monthly Global LNG Outlook studies the dynamics of LNG markets and forecasts how they will develop in the months and years ahead. The report tracks all major features from large LNG terminals and projects through to pricing. With detailed data on the volume and destination of LNG trade flows, as well as a deep dive on a current topic, the report provides comprehensive insight into the importance of LNG for different regions.

Insight
Each month, Insight looks at some of the most important issues in the market and covers these in greater analytical depth, analysing their key implications for the traded markets. The topics are wide ranging and include seasonal outlooks, geopolitical issues, supply developments and the impact from specific policy measures. Examples are analysis of China’s demand side, India’s gas market, and what export projects will advance in the future.

E-mail Alerts
E-mail alerts provide rapid, actionable insight into how market events, news headlines and policy developments will influence LNG markets and prices. E-mail alerts offer a short summary of the event as it happens, together with the implication for balances and any impacts on our market outlook.
**Panorama**  
The weekly Global Gas Panorama keeps subscribers on top of the latest supply, demand and price developments in the global LNG market. The report analyses key market developments, and offers our view for the weeks ahead. The insight, charts and tables in the report enable readers to successfully navigate the LNG sector and maximise profits.

**Notes**  
Notes discuss our outlook for supply, demand and prices at specific gas hubs, regions and countries. We deliver our forward-looking views derived from our balances and trends in the latest available fundamentals data. We examine key global demand centres such as those in Asia and Latin America, as well as gas supply and market balance developments in the major North American and Middle East markets.

**Global Gas Market Outlook**  
The global gas market outlook presentation provides Energy Aspect’s outlook for the development of the market. Easy to assimilate and available for use by clients in internal and external presentations (with due accreditation to Energy Aspects), we act as your outsourced analyst team.

**Access to analysts**  
Our global team of analysts delivers rapid responses to our clients on market queries, data, prices and forecasts. We host regular Insight events for clients to hear our market outlooks and meet our team.
